Cochlear™ Baha® 4 Sound Processor

The Cochlear™ Baha® 4 Sound Processor is delivered in a kit that includes the sound processor with an extra battery door, a magnetic battery removal tool, an abutment cover, a multi-pack of batteries, a cleaning brush, a safety line, stickers for left/right side usage, and a document pack.

NOTE: When ordering, specify your language requirements for the document pack. It contains important information such as the Patient User Manual and the Warranty Card. The sound processor will then be delivered with a document pack in the appropriate language. For more detailed information about each sound processor, please contact your local Cochlear representative.

NOTE: Not all products are available in all markets. Product availability is subject to regulatory approval in the respective markets.

Cochlear Baha Fitting Software

The Cochlear Baha Fitting Software 4.0 is available through the Cochlear Software Distribution System (CSDS) using a downloadable link. Cochlear will also continue to distribute CDs for clinics that do not have or are unable to access the internet. The Baha 4 Sound Processor can be fitted wireless using the Airlink. The BP100 and BP110 Power require cables that can be ordered as spare parts. Additional material such as data sheets, fitting guides or other promotional material will be available via a separate link or CD.

NOTE: Contact your local Cochlear representative to ensure that you always have the latest version of the Baha Fitting Software.

NOTE: Not all products are available in all markets. Product availability is subject to regulatory approval in the respective markets.
